Trout in the Classroom Teacher Training Program

Through a classroom experience of hatching fish eggs and coordinated activities, students experience first-hand the value of aquatic environments, the balance that must be met to maintain and preserve California's fisheries and aquatic habitats, and how their personal actions affect these valuable resources.

Successful completion of this training class qualifies teachers to apply for a permit to hatch fish, receive eggs and to receive classroom support and equipment to enable you to hatch fish in the classroom.

This program is co-sponsored by California Department of Fish & Game, Marin Municipal Water District, and North Bay Trout Unlimited.
